

## ITXcelerate Program Overview

**Day 1:** Opening ceremony

**Week 1: Information & Storage Management v5 - Instructor-Led Training:** Immerse yourself in a comprehensive training covering Information & Storage Management (ISM). Explore ISM concepts, strategies, and methodologies in daily sessions from 8 AM to 4 PM.

**Weeks 2-3: Studying & Certification:** Dive into focused preparation for the Information & Storage Management v5 exam & certification.

**Weeks 4-5-6: Product Knowledge and Dell Technologies Advantages:** Explore the intricacies of Dell products and gain insights into the advantages of Dell Technologies.

**Week 7: Data Science & Big Data Analytics v2:** This course sets the stage for the Data Science & Big Data Analytics v2 certification exam.

**Weeks 8-9: Studying & Certification:** Diligent preparation for the Data Science & Big Data Analytics certification.

**Weeks 10-11-12: Job Shadowing:** Step into the real world with on-site job shadowing at the Dell Technologies site in Riyadh. Witness day-to-day activities in the field and engage with various departments within Dell. You'll also tackle assignments and activities that simulate real-world field use cases, further enhancing your practical skills.

**Week 13: AI Fundamental Trainings:** Delve into the core principles of Artificial Intelligence. Explore its fundamentals, gaining insights into its capabilities and potential.

**Weeks 14-15: AI Project:** Immerse yourself in an exciting AI project that tackles a real-world challenge. Apply the culmination of your knowledge acquired from the program. This hands-on experience will sharpen your skills and demonstrate your ability to create innovative solutions.

**Closing Ceremony:** A Day of celebration and recognition awaits.
